

**Follow these steps to  
make your own mummy!**

- 1) The large rectangle is your mummy's body. Color it, the head, and the limbs or leave them blank.
- 2) Cut out each piece. (You may need adult assistance.)
- 3) Glue or tape the body together so that it makes a cylinder.
- 4) Take a piece of tissue paper. Fold or scrunch it up so that it is still the same length but is much more narrow and makes a skinny rope (bandage). Repeat as many times as necessary (~3).
- 4) Glue your bandages around the body. When you're done, glue or tape on the head and limbs.
