Follow these steps to make your own mummy!

1) The large rectangle is your mummy’s body. Color it, the head, and the limbs or leave them blank.
2) Cut out each piece. (You may need adult assistance.)
3) Glue or tape the body together so that it makes a cylinder.
4) Take a piece of tissue paper. Fold or scrunch it up so that it is still the same length but is much more narrow and makes a skinny rope (bandage). Repeat as many times as necessary (~3).
4) Glue your bandages around the body. When you’re done, glue or tape on the head and limbs.
